- ASP .NET
- PHP
- Postgres

- English
- French
- Arabic

Education

Computer Science DEC | Champlain College   **Aug 2022 - May 2025**

Projects

Dar El Salam Travel Company   **Aug 2024 - Feb 2025**

- Developing an application for DES Travel Company where staff and managers can input new travel tours, and customers can browse, reserve, and pay for tours.
- Technologies: React, Spring Boot, MongoDB. Methodologies: Agile, regular client meetings.
- Role: Full-stack developer, responsible for frontend, backend, and client communication.

Pet Clinic   **Aug 2024 - Nov 2024**

- Developing an application for managing product inventory and setting up appointments with veterinarians for a pet clinic.
- Technologies: React, Spring Boot, MongoDB, REST APIs. Methodologies: Agile, microservices architecture, API integration.
- Role: Product Owner and full-stack developer, delivering biweekly sprint reviews and coordinating with the team.

G A B I.   **Dec 2023 - Feb 2024**

- Developing an application that allows musicians to display their music, utilizing Spotify's API to let users listen to samples of each track.
- Technologies: XML for data input, Spotify API for music samples.
- Role: Full-stack developer, responsible for reading XML files, automatically generating pages with track information, and integrating links to music platforms like Apple Music and Spotify.

Fluent Fingers   **Jan 2024 - Jan 2024**

- Developing a Duolingo-like application for learning sign language, created in less than 24 hours during a hackathon with a team of four.
- Technologies: React, OpenCV (cv2 library) for AI training.
- Role: Full-stack developer, responsible for designing the frontend and integrating AI functionalities.

Work Experience

Barista/Server | Boulangerie Paillard   **May 2023 - Oct 2024**

- Delivered high-quality customer service in a fast-paced environment, collaborating with a small team to efficiently manage daily operations, ensure order accuracy, and maintain strong client relations.
- Trained and mentored new employees on service standards and workflow, fostering a cohesive team environment.
